Suite of Services

Freight Forwarding Services

We offer complete solutions to optimize the effectiveness of your unique supply chain needs. From Containers and Truckloads to Expedited Parcels and Specialized Cargo, our team will design tailored solutions that create efficiencies throughout all logistics sectors.

Freight Logistics Specialists

Our experience, network of international carriers and considerable buying power make us the freight logistics specialists you need. Our skill in managing the logistics and cargo movements between shippers and receivers is evident to do so while supplying the best shipping rates and securing the most efficient routes. There are many transportation methods freight forwarders can access on your behalf, depending on your requirements. Momentum Freight only suggests the right methods, and those tailored to your needs.

Ocean, Air & Ground Shipping

Ocean – International shipments by ocean are a staple service for many industries, especially when your requirements have large loads heading to various destinations globally. We cater to your needs with a vast network of major international ocean carriers, ensuring you access every possible ocean option available.

Air – Connecting to or from drayage service as part of a total shipment process, or as a long-distance haul on its own, our air cargo solutions play an integral part in the shipping process.

Ground – Whether you are transporting Full Container Loads (FCL) or Less than Container Loads (LCL), or Full Trailer Loads (FTL), or Less Trailer Loads (LTL), we have the right vehicles and time considered solutions for you.

Customs Brokering

For international shipments, we act as your Customs Broker and assist in navigating the complex rules and regulations of shipment transportation. This includes preparation of the appropriate documentation, calculation of applicable duties and taxes and coordinating the communication between government officials. An experienced customs broker will ensure that your shipment is cleared in the receiving countries efficiently and follows its journey through to completion with delivery to the receiver.
